

marigi **LOW IR-EMISSION EXHAUST SYSTEM**

Hermonit-430 coating on exhaust systems give you the possibility to keep under control the temperatures all around the pipes way. After many test and endurance we can say that our LOW IR-EMISSION coating still the best solution about control of temperature on exhaust system. Our system do not change the inside gas temperature, is not flameble and can work over 800°C. No IR emission means cooler engine, cooler water and cooler oil.

Hermonit-430 coating are installed on:
Moto3, Pre-Moto3,
R3Cup, K400, R300
SS600, R3/MT03,
Moto2.

Hermonit-430 coating was tested in World, European and Italian Championship. Following our usage specifications is it possible to reach 4500 km before maintenance or the complete season. Our technical specification of use are inserted inside the packaging of the products. For more information please do not hesitate to contact us.
