

LOW IR-ABSORPTION FUEL TANK

Hermonit-430 coating on FUEL TANK systems give you the possibility to keep under control the fluid's temperatures. After many test and endurance we can say that our LOW IR-ABSORPTION coating still the best solution about control of temperature on fuel filling line. No IR absorption means more fuel density, more power and more performance.

Hermonit-430 coating are installed on: World Championship bikes, World Championship cars, World Championship Kart.

Hermonit-430 coating was tested in World, European and Italian Championship. Following our usage specifications is it possible to reach 4500 km before maintenance or the complete season. Our technical specification of use are inserted inside the packaging of the products. For more information please do not hesitate to contact us.
